

A Guide to Herculiner

Herculiner is a tough, non-slip coating applied to the top rail of a pull type trailer

- ◆ Protects paint
- ◆ Resists corrosion cause by effects of residual fertilizer
- ◆ Protects frame from metal wear to paint wear point

2 year old unit without Herculiner

Unit with Herculiner

- ★ The first rule of spreader maintenance is to clean your unit regularly and NEVER store a unit with product left in the bed. Fertilizer is a caustic product. Regular cleaning will prevent corrosion.
